

DAVENPORT & ROCK ISLAND DISTRICT DENTAL SOCIETIES SPRING MEETING 2019

IMPROVING RESTORATIVE SUCCESS WITH IMPLANT SOLUTIONS (6 CE CREDITS)

COURSE SUMMARY:

This course is designed for restorative doctors who are looking to take the next step in implant restorations. With enhanced knowledge in esthetic implant treatment planning and available restorative options, we are in a better position to address both our patients' esthetic and functional concerns. Proper clinical diagnosis, updated clinical techniques, as well as good laboratory support are essential to ensure long-term predictable outcome for these patients. This course will concentrate on the techniques and materials required for optimal implant restorations in the everyday practice.
